

Adam Pikielny

Research Scientist at Adobe. Computational photography, computer vision, deep learning.
apikielny (at) gmail (dot) com / Website / PDF / Scholar / LinkedIn / GitHub

Experience

Research Scientist, Adobe — Marc Levoy's computational photography group 2022–present

- Built Reflection Removal end-to-end on a team of 2 — from research (CVPR 2025 oral, top 0.7%) through data and model scaling, on-device optimization (CoreML/ONNX), and deployment to millions of users in Lightroom, Photoshop, Camera Raw, and Project Indigo.
- Contributed to Project Indigo and mentored research interns leading to publications.

Research Intern, Adobe Summer 2020 and 2021

- Built After Effects' first ML-based effect plugin, leading to a patent.

Education

Brown University, B.S. Computer Science, Visual Computing and AI/ML pathways 2022

- Senior thesis, *Consistent Depth Estimation for Video*, won 1st Prize at the Brown CS Undergraduate Research Symposium.
- Graduated with Honors and won the Senior Prize in Computer Science.
- Research in James Tompkin's Visual Computing Lab on deep fake detection and depth estimation.

Publications

Hist2Style: Histogram-Guided Stylization with Bilateral Grids CVPR 2026

Dekel Galor, **Adam Pikielny**, Zhoutong Zhang, Ke Wang, Laura Waller, Jiawen Chen, Ilya Chugunov. Also spotlight at the CCD Workshop.

Removing Reflections from RAW Photos CVPR 2025

Eric Kee, **Adam Pikielny**, Kevin Blackburn-Matzen, Marc Levoy. **Oral, top 0.7% of submissions.**

Consistent Depth Estimation for Video Brown CS Senior Thesis, 2022

Adam Pikielny, Marc Mapeke, James Tompkin. **1st Prize, Brown CS Undergraduate Research Symposium.**

Towards Social Video Verification of Face Expression, Identity, and Lighting for DeepFake Detection Preprint, 2021

Alex Meyerowitz*, **Adam Pikielny***, Harman Suri, Eleanor Tursman, James Tompkin. *equal contribution.

Shipped Products

Reflection Removal: Adobe Camera Raw (2024), Lightroom (2025), Photoshop (2026), Project Indigo (2025) 2024-2026

One-click removal of window reflections from photographs. Productized from my CVPR 2025 research, with Eric Kee.

Project Indigo, Adobe Nextcam

2025

iOS camera app with full manual controls, an SLR-like look, and the highest image quality on iPhone in both JPEG and RAW. Ranked #5 in top free video/photo apps in the US one week after launch and hit 1M downloads in four weeks with zero marketing.

Open Source Contributions

pconfigs, Adobe (Apache 2.0)

A dataclass-based Python config library. Configs are typed, inheritable Python classes that live next to the code they configure, instead of brittle text files that drift out of sync. We used it throughout the reflection removal project.

Patents

Removing Image Overlays

filed Jan 2024

Eric R. Kee, **Adam A. Pikielny**, Marc S. Levoy. US Patent Application 18/426,758. Adobe Inc.

User Interface For Adjusting Image Effects Depicted In Images

filed Dec 2024

Thomas Knoll, Eric R. Kee, **Adam A. Pikielny**. US Patent Application 18/975,655. Adobe Inc.

Machine Learning-Based Chroma Keying Process

Oct 2024

Seoung Wug Oh, Joon-Young Lee, Brian Price, John G. Nelson, Wujun Wang, **Adam Pikielny**. US Patent 12,106,398. Adobe Inc.

Awards & Honors

- CVPR 2025 Oral, *Removing Reflections from RAW Photos* (top 0.7% of submissions)
- Senior Prize in Computer Science, Brown CS, 2022
- 1st Prize, Brown CS Undergraduate Research Symposium, senior thesis, 2022
- Adobe MAX Sneaks 2023, *Project See Through*

Invited Talks

Guest lecture, *Reflection Removal*, CSCI 2240: Advanced Computer Graphics, Brown University

Apr 2026

Guest lecture, *On-Device Computational Photography*, CSCI 1290: Computational Photography, Brown University

Oct 2025

Teaching

Teaching Assistant, CSCI 0220 Discrete Structures and Probability, Brown CS

2020

Teaching Assistant, CSCI 1230 Introduction to Computer Graphics, Brown CS

2021

Press

Project Indigo
